

# ARCTIC TERN

design

no. 86

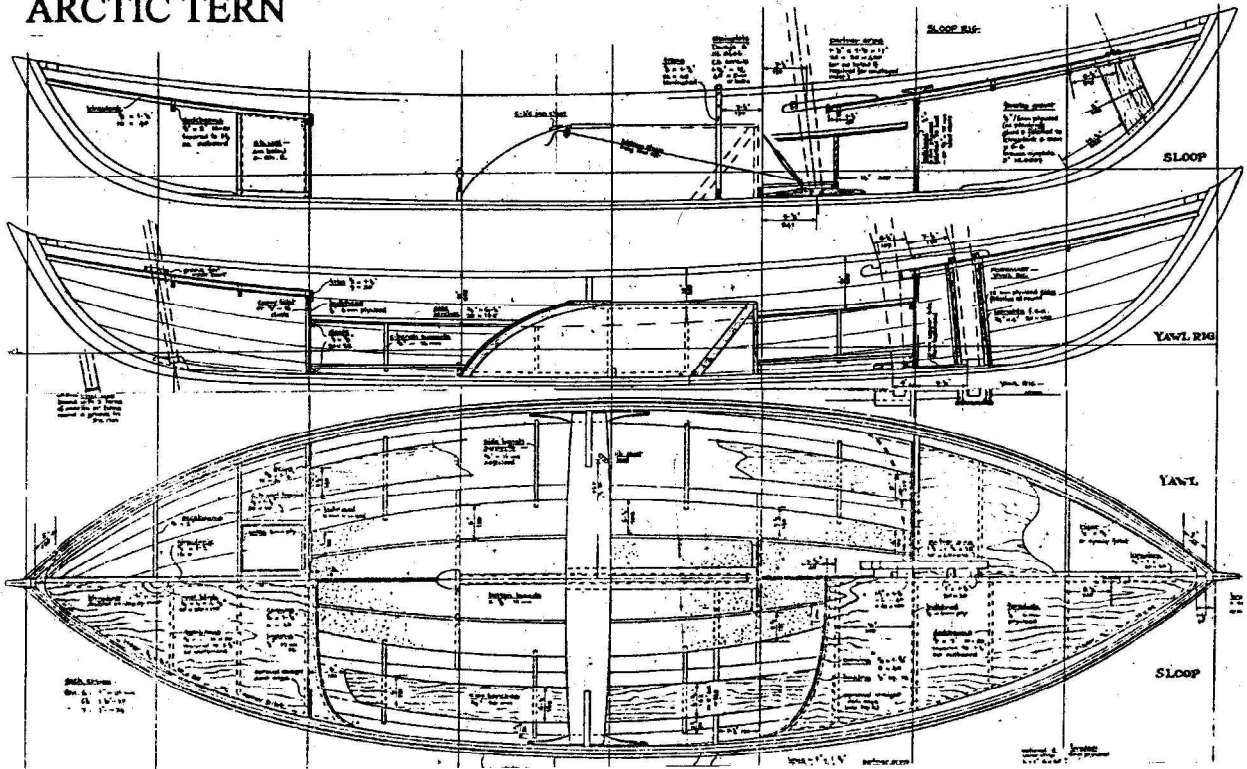

LOA: 18'-2"    Beam: 5'-4-1/2"    Weight: 240 lbs    Sail: 102 sq ft (lug) 120 (sloop)  
5.52m        1.64m            110 kg            9.48 sq m        11.15 sq m

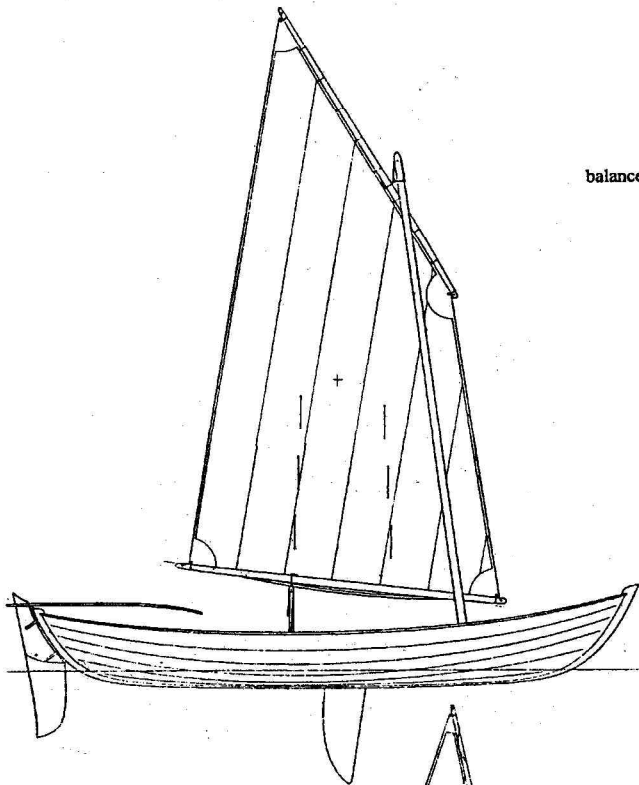

Type: double-ended beachboat    Sailing rig: balanced    lug, yawl or gunter sloop    Capacity: 1 to 4

**T**he newest in the range of double-enders, this elegant little vessel began as a 95% scaled-down NESS YAWL. Although originally drawn up with the same four-strake planking layout, it was decided to re-draw the lines as a round-bilge hull with six strakes a side. This gives the boat an appearance closer to the traditional Shetland yachts.
